Thank you for showing an interest in taking part in the Warriors and MMU science project in partnership with BBC Children In Need and the Wellcome Trust.

The first few questions are all about your views of science.

Would you say you

- a) really liked science
- b) sometimes like science
- c) really don't enjoy science

Why do you think you have these views about science?

If you had to describe science in 1 or 2 sentences what would it be ?

**This project is hopefully going to stimulate your imagination as well as enjoyment around science**

The project is going to be formed all around **YOUR** ideas!!

**What would you like to learn about?**

Below is a list of some ideas, but that's all they are suggestions.

Do any of them catch your imagination or have you got any other ideas you would like to learn about.
